

SCREW COMPRESSOR

# FM-Series

### The FM - series

is a very economical compressor due to its simple design. It has a built-in check valve and suction strainer.

Customers can choose either a pump lubrication system or a pressure differential lubrication system. This compressor is also maintenance-friendly. Adjusting the coupling alignment is simple as the motor comes with a standard flanged motor (B35) design.

The operating conditions, including the process line, allow for a stable process.

The rotor design of this compressor, the same as the SCV series, allows for high volumetric efficiency resulting in high energy efficiency.
